PROJECTS

AI Summarizer Application

An article summarizer application using open AI's GPT model with a modern user interface, connection to Open AI's model, the intergration of RTK(Redux Toolkit Query). Functionalities like copy to clipboard, browser history storage and many more.
Technologies used include: Setup ReactJS project using Vite. Created UI/UX using Tailwind CSS, and then made advanced RTK query API requests that fire on condition.

Dating website landing page

A landing page for dating website called Finder with animation using HTML and CSS.

Social networking website

A responsive social media website like facebook using HTML, Javascript and CSS. Added a toggle button on this design, that changes the website from light mode to dark mode. This was part of my ALX curriculum.

CERTIFICATION

2023

Frontend Developer

Enrolled in 1 year ALX software engineering program. ALX is an intensive 12-month program equipping with the skills and network to become a front-end developer or a back-end developer. It includes low-level and high-level programming, algorithms, and databases. Certificaton in progress.
2023

Web development

Obtained a web development certification through Sololearn for website development. Includes all website development fundamentals.
